Crop rotations break up disease and insect cycles

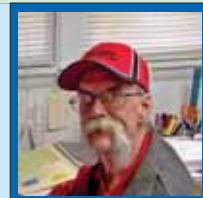

Legumes fix their own nitrogen

Hear Jeff in Fort Benton, Conrad and Power

## Cereal Disease Outlook for 2012

Jeff Farkell, CPAg, CCA  
Control

Jeff Farkell is an experienced crop consultant in the Brady area, and he will share his experiences in rust control from 2011. The big question is: Are we looking at the same rust problems as last year?

Hear Kent in Chester, Havre and Denton

## Improving Pulse Crop Production

Dr. Kent McVay, Ph.D  
Cropping Systems Specialist  
MSU, Southern Ag Research Center

Getting an alternative crop in your rotation can yield big benefits in improved soil conditions, less cereal disease, breaking pest cycles and may result in improved yields in your cereals. Kent will provide guidelines and tips on how to improve your crop rotation and your bottom line.
