AgGPS EZ-Steer Assisted Steering System: Supported Platforms Vehicle List

This Support Note lists vehicles that are supported by the Trimble® AgGPS® EZ-Steer® assisted steering system.

The EZ-Steer assisted steering system can be installed on any of the following Trimble approved agricultural vehicles. More vehicles are approved every week. For the latest list of approved vehicles, go to www.trimble.com/agriculture.

Note: Use only official Trimble manufactured platform kits with the AgGPS EZ-Steer assisted steering system. Many of the Trimble platform kits include spacers and shims that are essential to prevent steering column damage and degraded performance. Always follow the installation instructions provided with the platform kit for your vehicle.

[1] Trimble recommends that you only use an EZ-Steer system on these vehicles on relatively smooth ground.

[2] Above 24 km/ph (15 mph), you may not get the specified accuracy on this vehicle.

Caution – **Do not** attempt to manufacture or modify brackets for the EZ-Steer system. If you do not use official Trimble platform kits or if you modify a Trimble platform kit:

- Warranty will be void

- *Steering columns may be damaged, especially on vehicles with plastic steering column shrouds*
- *Safety problems could result if the brackets interfere with controls*
- *Performance could be affected if there is any flex or movement*
